47th Annual Production Sale

# Loonan

STOCK FARM

Private Treaty Opening Day  
**Saturday, February 5, 2022**  
1:00 p.m. sharp in heated building  
Lunch: 11:00 a.m. – 12:30 p.m.

**Red Angus • Red Simmental • Red SimAngus™**

## 100 Bulls

*Purebred and Percentage • Affordably priced at \$3,000, \$3,200 or \$3,500*

### BULL SALE TERMS

- Buy your bulls February 5 and we'll keep, feed, vaccinate, carcass ultrasound & semen test.
- You may pick up your bulls after testing and prior to June 30 or, Loonans will deliver – free – up to 300 miles when in your area (over 300 miles, please inquire).
- Delivery will begin April 1 and be completed by May 10 when we start our AI season.
- If you cannot take your bulls when deliveries are made in your area, you may pick them up at Loonan's later (prior to June 30). Let us know.
- Bulls not sold February 5 will remain on sale until sold out, as in previous years.
- If you cannot be present February 5, we will have a representative on-hand to handle written and phone requests on a "least cost" basis. Satisfaction guaranteed.

## Change is a Good Thing

They say that change is a good thing, so after much thought and discussion we have decided to not sell any of our 2021 heifer calves in this year's sale. We will be offering them for sale as bred heifers in the fall. They will still be sold in small groups of two, three or four, but will be penned by calving due date, sire, etc. They will be priced with the option to bid on them, and can be taken home that day.

We have had requests for selling them as bred, so we are going to try it for 2022. Each heifer will be taken care of the same and will come with an ultrasound picture, just like they do on the Leave 'Em and Breed 'Em program.

Bulls will be sold as in the past on February 5, 2022.

"Located in the hills of southwest Iowa"

Judy Loonan  
Rick Thompson, Herdsman

Phone: (641) 322-3921 • 1724 Holly Avenue • Corning, IA 50841 • Email: lsfrass@gmail.com

**Judy Loonan – (515) 423-5642 (cell) • Rick Thompson – (515) 229-0920 (cell)**

Dear Friends,

Thank you for your interest in our program. As we all know, the demands on our day-to-day activities take a lot of attention. We truly appreciate you taking time to look at what our program has to offer.

We are dedicated to raising cattle that will work for our customers in whatever way your program takes you. Our goal is to raise functionally sound cattle that calve easily and grow rapidly with a calm disposition. We are continuing to improve our genetics so we can help you move forward with yours.

We have purchased three new sires that will have calves in our production sale this year. We acquired Profitbuilder at the Cross Diamond sale. He is a really solid bull with loads of depth and capacity. His calves carry the same look.

Likeable G288 is a bull we used on heifers that came from the Beckton Red Angus herd. He is a really long-sided bull with a great set of EPDs. Finally, Hooks Geyser is a purebred Simmental that we bought on the Hooks Simmental sale in Minnesota. He carries plenty of frame and has good carcass EPDs.

This year Judy and I have decided not to put any heifers on the sale. It was a big decision to make but we think it will work for the better. I guess we're going to find out.

The heifers will be bred just like every other year and after they are ultrasounded, we will sell them just as we would in the sale in groups of two and three head and according to sire group, weight, frame and breeding dates. We plan on selling them sometime in late September we will send out information at that time. If you have any questions, please feel free to call.

We look forward to seeing you on February the 5th. We would encourage if you can, to come take a walk through the bulls before the sale. It is easier to watch them in their natural environment. Please feel free to call anytime. We would love to visit about the bulls.

As I bring this to an end, we would like to wish everyone a prosperous New Year and thanks again for your business.

**Judy Loonan**

**Rick Thompson**

*Judy and Rick*

## Care and Management of Yearling Bulls

*We occasionally receive questions regarding the proper care and management of yearling bulls. The following suggestions came from other seedstock producers and extension beef specialists:*

1. Yearling bulls coming off test need to be in good condition in order to withstand the expected 100-300 lbs. weight loss during breeding season. Between the test period and start of breeding season, 8-13 lbs. of grain plus good quality hay or pasture is suggested.
2. During breeding season, young bulls are still growing in addition to their breeding duties. Semen production takes 60 days and poor pasture or inadequate nutrition can severely affect libido, semen quality and quantity.
3. A maximum 60-day breeding season is suggested for yearling bulls, or rotation, to allow them time to rest.
4. Following the 60-day breeding season, proper nutrition can pay big dividends in future development and usefulness of the young bull. This is a very critical age as they start losing their teeth at 18-24 months of age and cannot utilize roughage as well as with permanent teeth. Research indicates that a bull's usefulness as a two-year-old can be retarded if not properly reconditioned after use as a yearling. Feeding 10-15 lbs. of grain (depending on condition) until the bull is two years old, will help recover the lost weight and provide the nutrition needed for continued growth.
5. Annual deworming and treating for lice when needed helps reduce stress and improves feed efficiency.

*These guidelines were developed by beef specialist to help maximize the benefits of superior genetics.*

## Sale Terms & Conditions

### Health

Bulls and heifers were vaccinated by a licensed veterinarian as calves, including BovaShield Gold 5 (IBR, PI3, BVD, BRSV) One Shot (Pasteurella, 7-Way, Blackleg and Haemophilus), Inforce 3 intranasal (IBR, PI3, BVD, BRSV), poured for grubs and lice, and dewormed with an oral wormer and Ivomec. The heifers were calfhood vaccinated for brucellosis.

### Registration

On registered females, please give your name, address and association number to the clerk and the seller will transfer at no cost to the buyer. On bulls, seller will pay this cost if you desire registration papers. Please notify the clerk.

### Sale Procedure

- All cattle are priced in the catalog at affordable prices.
- No cattle are sold or reserved prior to 1 p.m., Saturday, February 5, 2022.

### Sale Order

Bulls will sell first, starting promptly at 1 p.m., Feb. 5, 2022. **None are sold or reserved ahead of time.** We plan a 15-minute break following the opening round of the bull sale to allow buyers who need additional bulls to make their selections.

If you have any questions, give Judy or Rick a call.

### Selling Procedure

Cattle are ready for inspection now. All are affordably priced in the catalog. Please register as you arrive February 6. Sale order will be determined by the buyer in order of registration. If your selection is called to the ring prior to your buyer number being called, you will have the privilege of raising the bid. Normally, some bulls sell at the listed price and some bring more if several buyers are interested in the same animal, but every buyer has an equal opportunity to buy the bull of their choice.

If you cannot attend February 5, we can make arrangements to have someone represent you on a least-cost basis. Satisfaction guaranteed.

### Guarantee

All cattle carry the standard breeding guarantee of the respective breed association. Bulls will be semen evaluated with a certificate furnished. Bulls will be wintered on a high roughage test ration, semen tested and ultrasound scanned in March. You may pick up your bulls beginning April 1 or Loonans will deliver when in your area. Most deliveries are made April 1 to May 10. Please contact Loonans on cost of deliveries over 300 miles.

# Red Angus Guide to EPDS and Indexes

**ProS...** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB.....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED .....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW .....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW .....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW .....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG .....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI .....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK .....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME .....** Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG .....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM .....** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY .....** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB .....** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG .....** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW .....** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA .....** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT .....** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

# RED ANGUS MARKETING PROGRAMS

## How to Enroll in FCCP and AA

1. The producer contacts the Red Angus Association of America at **940-477-4593** and answers a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.

**FCCP Tags**  
99¢ each

**Allied Access Tags**

## A-BAG-A-BULL

**RED ANGUS**  
RANCH TESTED. RANCHER TRUSTED.

If you purchase a bull from us, we will provide you with credit equal to the value of one bag of Feeder Calf Certification Program or Allied Access tags for each bull you purchase. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. Cattle enrolled in the FCCP are accepted into the exclusive Choice+ and G.O. Red grids. The FCCP 'yellow tags' are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or halfblood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

## UNDERSTANDING AND USING ASA'S SELECTION INDICES

By Wade Schafer Ph.D.

API. The API evaluates sires being used on the entire cowherd (bred to both Angus first-calf heifers and mature cows) with a portion of their daughters being retained for breeding and the steers and remaining heifers being put on feed and sold grade and yield. All EPDs, with the exception of tenderness, are taken into consideration in this index.

API puts heavy emphasis on bulls with good STAY (an estimate of the likelihood of a bull's daughters staying in the herd). This should come as no surprise; research has consistently shown that reproduction trumps all else in economic importance. STAY improves your bottom line by lessening the need for replacement females. Reducing your requirement for replacements allows you to market more young, high-value females, cuts your costs for heifer development and changes your herd's age structure so a larger portion of your females are in their most productive years (5 through 10).

Direct and maternal calving ease also get substantial weighting in the API. This is because they are strongly associated to calf survivability and, to a lesser degree, female longevity. Given that milk is essentially neutral in the index (the top 25 API bulls are only in the top 40% for milk), we can conclude that the benefits of increased weaning weight due to milk is negated by the additional cost associated with increased milk production.

It may be difficult for breeders to accept that the API places downward selection pressure on growth, as it is counter to the direction taken

in most breeding programs. Though increasing growth is invariably a good thing in terminal sires, its strong association with mature size makes it less desirable in replacement female sires, as increasing mature size increases cowherd maintenance requirements. Keep in mind that the positive benefits of increased growth in sires' steers and cull females are accounted for in the API. Nevertheless, the index is telling us that the extra cost of maintaining larger cows outweighs the benefit of increased growth in other areas of the system.

Even so, the API is evidently finding sires with more carcass weight than would be expected given their growth potential. (The top 25 average in the 95th and 90th percentiles for weaning and yearling weight, while reaching the 70th percentile for carcass weight.)

From the top 25, it is evident that more weight is placed on marbling than yield grade. This is likely because there is no financial incentive to improving yield grade unless there is a problem (i.e. yield grades reach 4); for the most part, due to Simmentals superior yielding ability, SimAngus half-bloods see few discounts for yield grade.

TI. The TI is designed for evaluating sires' economic merit in situations where they are bred to mature Angus cows and all offspring are placed in the feedlot and sold grade and yield. Consequently, maternal traits such as milk, stayability and maternal calving ease are not considered in the index.

## RED ANGUS FCCP MARKETING PROGRAMS

The Red Angus Feeder Calf Certification Program is the first step in differentiating your cattle to buyers, feedlots and packers.

Experience industry-leading return on investment for just the cost of an ear tag  
– with no enrollment fees.

The Red Angus Association of America  
Marketing Team offers assistance to  
Red Angus bull customers at no charge.

### Feeder Calf Certification Program

- Traceability to at least 50% Red Angus genetics
- Source verified to ranch of origin
- Group age verified

Eligible for Choice+ and G.O. Red Grids  
No enrollment fee, 99¢/tag  
840-compliant EIDs available upon request

**GENETICS  
SOURCE • AGE**

**RED ANGUS**  
RANCH TESTED. RANCHER TRUSTED.

## RED ANGUS MARKETING PROGRAMS

The Red Angus Allied Access Program provides age and source verification without genetic restrictions.

Allied Access provides Red Angus customers with a value-added solution for their crossbreeding programs.

It was created with the FCCP's same user-friendly features and carries on its tradition of being the industry's most-trusted program with marketing assistance at no charge.

SOURCE • AGE

### Allied Access

- Source verified to ranch of origin
- Group age verified

Not eligible for Choice+ or G.O. Red Grids  
No enrollment fee, 99¢/tag  
840-compliant EIDs available upon request

**RED ANGUS**  
RANCH TESTED. RANCHER TRUSTED.

Three maternal brothers had Rib Eyes of 14.6, 15, and 14.44 , two Choice and one Choice Minus marbling. He is the youngest calf offered on our sale but fits right in with the older ones. Red Angus Association figures.													

## Notes

# A Look At Frame Score

*One frame score equals roughly 2" in hip height.*

We have agreed with our bull buyers for several years that the frame scores calculated for our catalog using the BIF formula seem unrealistically low. The bulls grow out bigger than that. For 2000-2004, we re-measured the bulls in March and compared that to the original frame score based on December measurements. In all cases the frame scores

went up. Some by more than a full frame score.

**Note:** We hear a lot about the need for uniformity in beef cattle. Frame size measurement is not an exact science, but we do believe the uniformity in the entire Loonan program, along with the natural fleshing ability, is why calves by Loonan bulls excel on the rail.

## About The Catalog

**RED ANGUS** has four categories of registered Red Angus.  
**1A** – Purebred 100% Red Angus with no disqualifying characteristics.

**1B** – 87% to 99% Red Angus with no disqualifying characteristics.

**II** – 86% or greater Red Angus blood, also 1A and 1B animals that are disqualified because of scurs, white in front of navel, etc. Multiple sire animals (more than one purebred bull in pasture) are also Category II.

**III** – Less than 87% Red Angus blood.

**SIMMENTAL** has a complete upgrading program from the half-blood to the purebred.

**POLLED:** P = Polled  
P/S = Polled/Scurred,  
DP = Double Polled (both parents polled)  
H = Horned

## EPDs (Expected Progeny Difference)

Simmental data is from the American Simmental Association. Red Angus data is from the Red Angus Association of America. Growth and carcass EPDs are configured on the same common multi-breed base.

*EPDs in the catalog are current as of this fall. When new data is processed by the associations, these figures will be updated and adjusted and the EPDs on your registration papers may not be the same as those available at sale time due to new data at the association.*

### EPD Terms

**CEh** – Calving Ease Heifer:

**Simmental:** Expected ease with which calves sired by the bull will be born to first-calf heifers. Highest (+) figures mean more unassisted births. Lowest (-) figures mean less unassisted births.

**Red Angus:** Expresses calving ease as CED (Calving Ease Direct). We have ranked each bull one-, two- or three-star based on the best information we have available on the individual and close relatives.

\*\*\* Should produce few calving problems when bred to first-calf heifers.

\*\* Should work well on growthy heifers and cows.

\* Recommended for use on cows only.

**BW** – Birth Weight EPD

Expected birth weight of calves sired by this bull. Heavier (+) or lighter (-) than "0" EPD animals are expressed in pounds. The BW EPD takes into account the genetics of the sire and dam and the actual birth weight of this bull. We weigh all calves on a spring scale within 24 hours of birth. We do not estimate any birth weights. Some calves born late on pasture are not weighed and are reported as UNK (unknown).

**WW** – Weaning Weight EPD

Expected weaning weight of this bull's calves, heavier (+) or lighter (-) than an animal with a "0" EPD are expressed in pounds. Weaning weight EPD takes into account the genetics inherited from the sire and dam in addition to the actual 205-day weaning weight of the individual.

**YW** – Yearling Weight EPD

Expected weight of this bull's calves at 365 days of age, expressed in pounds, heavier (+) or lighter (-) than an animal with a "0" EPD.

**MCE-h** – Maternal Calving Ease EPD of first-calf heifer

**Simmental:** Expected ease with which this bull's daughters calve as first calf heifers. Larger positive figures indicate a higher percent of unassisted births (MCEc - cow).

**STAY** – Stayability EPD – Red Angus

Predicts the probability of a bull's daughters remaining productive until at least six years of age.

**ME** – Maintenance Energy EPD – Red Angus

The ME EPD predicts differences in energy requirements of mature daughters of an individual and is expressed in Mega-calories per month.

**MM** – Maternal Milk EPD – Simmental or **M** – Milk EPD – Red Angus

Expected increase or decrease in weaning weight of daughters of this bull due to milk production compared to breed average. **Note:** Data on this trait is limited, and, in many instances, has low accuracy.

**Marb** – Marbling EPD

Predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass grades.

**REA** – Ribeye Area EPD

Predicts differences of carcass rib eye area between the 12th and 13th rib. Ribeye area is positively correlated with carcass yield grade which also considers fat thickness and carcass weights.

**FAT or BF** – Backfat EPD

Predicts differences for carcass fat depth over the 12th rib as expressed in inches. Fat thickness is negatively correlated with carcass yield grade which also considers ribeye area and carcass weights.

**API Index** – All-Purpose Index – Simmental

API evaluates sires being used on the entire cowherd (bred to both Angus first-calf heifers and mature cows) with a portion of their daughters being retained for breeding and steers and remaining heifers being put on feed and sold on grade and yield.

**TI Index** – Terminal Index – Simmental

TI is designed for evaluating sires' economic merit in situations where they are bred to mature Angus cows and all offspring are placed in the feedlot and sold on grade and yield.

**HB Index** – HerdBuilder Index – Red Angus

HB will assist in building profitable cowherds with bulls mated to both heifers and mature cows, replacement heifers retained in the herd and remaining progeny sold on a quality-based carcass grid.

**GM Index** – GridMaster Index – Red Angus

GM will increase profitability with bulls mated to mature cows and all progeny sold on a quality-based carcass grid.

**Red SimAngus™** –

The Red Angus Association of America and American Simmental Association have worked together to build a multi-breed database that includes SimAngus™. In the catalog, I have used the Association for the sire of each calf to publish as long as available.

# PROFIT. REPEAT.

**Generate repeated profits with the industry's most-favored female.**

Independent research from a decade of data collection showed Red Angus-sired heifers commanded \$66/head more than females of other breed types. That's nearly \$5,300 on a single load of replacement heifers to boost profits on your operation.

Visit **RedAngus.org** for details on the industry's most-favored female.

47th Anniversary Production Sale

**Saturday, February 5, 2022**

Private Treaty Auction • 1 p.m. CST Sharp

At the Farm • Corning, Iowa

RED ANGUS • RED SIMMENTAL • RED SIMANGUS™

### 100 Yearling Bulls

- 30 years of carcass traits, ultrasounding since 1993
- Calving ease
- Performance
- Disposition
- Uniform, thick and easy-fleshing
- Priced from \$3,000, \$3,200 and \$3,500

Heifers will be offered private treaty  
in the fall as bred heifers.

For 47 years, we have been breeding cattle with our customers in mind. Every breeding decision we make is weighed on the principles of balanced traits that deliver profitability.

Through complete, predictable genetics, we are able to offer our loyal customers options that fit their operation whether they are selling calves off the cows, backgrounding or finishing. And if our customers retain their replacement females, they can be confident our genetics will carry the maternal qualities that make superb, productive cows.

*We encourage you to share your operation's goals with us and let us help you discover how Loonan genetics can add profitability to your bottom line.*

*Visitors are welcome to visit the farm  
before the sale to view the bulls. Just give us a call!*
