The bulls that ran in the pastures with these heifers were hand picked by Rick and I and we were very critical in what we purchase. Their EPD's are consistant throughout and they are calving ease bulls not just light birthweight. Most of these bulls were used in our herd and then moved into the Leave Em program as we introduced new sires. There cost was from \$8000 to \$17000.

We ran DNA tests on these two heifers but couldn't get a hit so they are purebreds that are considered category 3's. They will make excellent cows and we would of liked to keep them but can't without their pedigrees.
